RAL colors and finishes outside the Instal Projekt palette incur an additional charge of +25% on the product price (this applies to colors that have no equivalents in the IP palette).

## Remember

- Printed colours are for illustrative purposes only. The colour of the radiator may differ significantly from the sample shown.
- The conditions for additional payments in the colour palette apply to all products from the Instal Projekt price list, including central heating radiators, electric radiators, valve sets and accessories.
- Any exceptions are indicated for individual products in the price list.

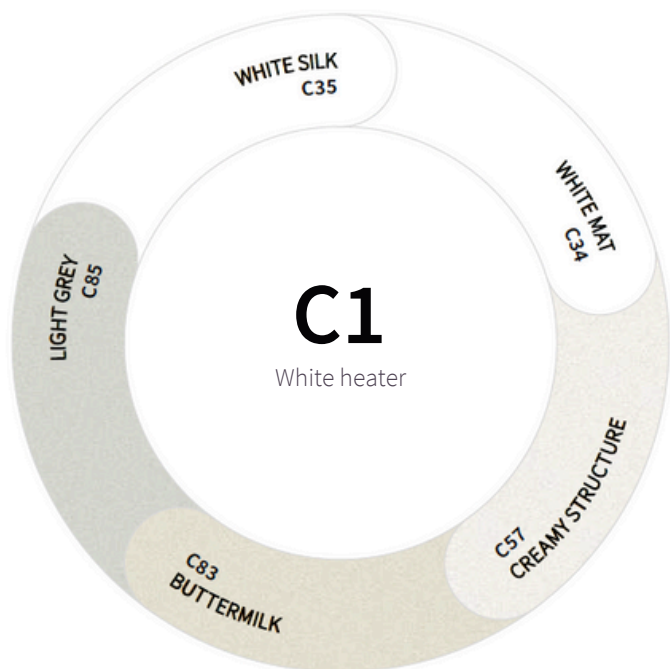

Our modern paint shop is recovering 99% paint. By reducing waste, we protect the environment.

# Sources of the coating's reliability

- We protect the surface with at least two layers of external coating.
- We provide triple corrosion protection for the product by using zirconium passivation nanotechnology.

## Suggested combinations of colors from the IP palette with electric heater colors

- All products are alkali-degreased and rinsed with DEMI water, significantly improving the quality of the coating.
- We take no risks. We use paints exclusively from trusted and leading manufacturers worldwide.

• Note: The HOT<sup>2</sup> electric heater is the only model available in gold color.

EDITION No. 02.2025.
